# **Department Of Zoology**

# Syllabi for B.Sc. Honours in Zoology offered by the Department Under CHOICE BASED CREDIT SYSTEM

# Session 2017-2018

The course of B.Sc. Zoology is introduced under CBCS syllabus, 2017 vide BOS resolution dated 5th August, 2017

Total Change= 88.30%

PRadyof Kumar Medda

#### **Program Outcome:**

After completion of the B.Sc. Degree program, the students will be able to

PO No.	Program Outcome		
PO 1	Recognize the scientific tempers and attitudes, which in turn can prove to be beneficial for the society since the scientific developments can make a nation or society to grow at a rapid pace.	R	
PO 2	Understand scientific knowledge and exchange ideas with other stakeholders; make people aware about sustainable utilization of resources with ethical approach.	U	
PO 3	Understand and apply the issues of environmental contexts and sustainable U development as a basic interdisciplinary concern.		
PO 4	Create the ability to perform experiments and to analyse & interpret the obtained accurate results and thus gain the ability to solve problems, to involve in critical, independent, and creative thinking.	An, E, C	
PO 5	Possess expertise to apply and formulate ideas which will provide them competitive advantage in pursuing higher studies from India or abroad; and seek jobs in academia, research or industries.	Ap, E	
PO 6	Assemble the acquired in-depth knowledge of applied subjects towards the inculcation of professional and employment skills so that students can make a career and become an entrepreneur in diverse fields.	С	

R= remembering, U = understanding, Ap = applying, An = analysing, E = evaluating, and C = creating

### **Programme Specific Outcome:**

After completion of the B.Sc. Zoology programme the students would be able to

<ul> <li>PSO 1 Identify, classify and differentiate diverse nonchordates and chordates based their morphological, anatomical and systemic organization, and understand the cological and evolutionary significance, physiological adaptations, developme different behavioral aspects including reproduction.</li> <li>PSO 2 Understand the relationship or synchronization among structure and function molecular, cellular, morphological, anatomical, biochemical, physiological a genetical aspect of animals and apply the acquired skills in the fields of ecolog genetics, molecular biology, biotechnology, biostatistics, bioinformation qualitative and quantitative microscopy, enzymology and analytical biochemistry PSO 3 Understand and evaluate the physical features of environment to the structure populations, communities, and ecosystems, environmental degradation a formulations for its protection, conservation of the species with reference to log importance.</li> </ul>	Cognitive Level	
<ul> <li>molecular, cellular, morphological, anatomical, biochemical, physiological a genetical aspect of animals and apply the acquired skills in the fields of ecolog genetics, molecular biology, biotechnology, biostatistics, bioinformatic qualitative and quantitative microscopy, enzymology and analytical biochemistry</li> <li>PSO 3 Understand and evaluate the physical features of environment to the structure populations, communities, and ecosystems, environmental degradation a formulations for its protection, conservation of the species with reference to loc importance.</li> </ul>	ir i	
populations, communities, and ecosystems, environmental degradation a formulations for its protection, conservation of the species with reference to loo importance.	d y, s,	
	d	
50.4 Describe and analyse economic, ecological and medical significance of various animals in human life and thus apply in the entrepreneurship of their own on sericulture, apiculture, fisheries, poultry farming, environment monitoring and parasitic disease management.		
PSO 5 Apply and implement the varied range of subject based skills to numerous fiel that provide a foundation for future career in higher studies, governme departments, environmental agencies, teaching, biotechnology, diagnost research laboratory, pharmaceutical, environmental and ecological fields.	11 2,

#### **Question Pattern**

Full Marks: 50

Q1. Choose the correct answer from the following options (any five):  $5 \times 1=5$ 

Q2. Briefly state the following questions (any five):  $5 \times 1=5$ 

Q3. Write down the following questions (any five):  $5 \times 3 = 15$ 

Q4. Match the Column-A with Column-B (any one): 5

Q5. Describe briefly the following questions (any four):  $4 \times 5 = 20$ 

Pradyot Kumar Medda

	SEMESTER – I
Course name	NON-CHORDATES 1: PROTISTS TO PSEUDOCOELOMATES
Course code	UGZOOCC01
Number of lectures	105
Credits	6
Marks	100
New addition: 73% (I	

After completion of this course the student will be able to

C11 81	and the dole to
SI. No.	Course Objectives:
1	Remembers, understands and apply the basic taxonomy, systematics and classification of Protozoa, Porifera, Cnidaria and Helminth groups, including Nematode- Plant interaction.
2	Understand and evaluate the life cycle of Protozoans, Platyhelminthes, Nematodes.
3	Understand and evaluate the host-parasite relationship and evolution of parasitism
4	Understand, apply and analyse the identification of invertebrate specimens and their life stages.

# Core T1: NON-CHORDATES I: PROTISTS TO PSEUDOCOELOMATES 4 Credit

## Unit 1: Protista and Metazoa

15 Class

3 Class

10 Class

2 class

8 class

- General characteristics and classification of Protozoa up to phylum (according to Levine *et. al.*, 1980).
- Locomotion in Protista (Amoeba, Paramoecium and Euglena).
- Reproduction in Protista (Amoeba, Paramoecium and Euglena).
- Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of Plasmodium vivax, Entamoeba histolytica, Giardia intestinalis, Trypanosoma gambiense, Leishmania donovani.
- Malaria types (other than P. vivax), causative agents, mode of infection in human, major mode of treatment, major vector species in India and their control measures.
- Symmetry, origin and evolution of Metazoa.

#### Unit 2: Porifera

- · General characteristics and classification up to classes.
- Canal system and spicules in sponges.

#### Unit 3: Cnidaria

- · General characteristics and classification up to classes.
- Polymorphism in Cnidaria.
- Metagenesis in Obelia.
- Corals and coral reefs (including conservation).

#### Unit 4: Ctenophora

# General characteristics, evolutionary significance and classification up to classes.

#### Unit 5: Platyhelminthes

- General characteristics and classification up to classes.
- Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of Fasciola hepatica and Taenia solium.

Predyot Kumps Medda ASSOCIATE PROFESSOR AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

#### Unit 6: Nematoda

- General characteristics and classification up to classes.
- Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of Ascaris lumbricoides and Wuchereria bancrofti
- Nematode- Plant interaction; Gall formation.
- Myasis.
- Physiological and biochemical parasitic adaptations in helminthes

#### Unit 7: Concepts of Parasitism

- Brief introduction of Parasitism, Parasite, Parasitoid and Vectors (mechanical and biological vector).
- Host parasite relationship (including molecular aspects).
- Origin and evolution of parasitism.

#### Unit 8: Basics of Animal Classification

- Systematics : definition, place and role in biology.
- Taxonomy : Definition, scope and different levels (alpha, beta and gamma taxonomy, micro and macrotaxonomy).
- ICZN and its important rules (Principle of nomenclature, authorship, priority, synonymy and homonymy).
- Type concept.
- Six kingdom and three domain concept of classification.

#### Core P1: NON-CHORDATES I: PROTISTS TO PSEUDOCOELOMATES Lab 2 credit List of Practical

- 1. Identification of Amoeba, Euglena, Entamoeba, Opalina, Paramecium, Plasmodium (from the prepared slides) [Name of specimen, name of phylum and two specimen characters].
- Identification of Sycon/Scypha, Neptune's Cup, Spongilla, Obelia, Physalia, Millepora, Aurelia, Tubipora, Corallium, Gorgonia, sea anemone, Pennatula, Fungia, brain coral, Acropora [Name of specimen, systematic position upto class and two specimen characters].
- 3. One specimen/ slide of any ctenophore.
- 4. Staining/mounting of any protozoan/helminth from gut of cockroach.
- 5. Study of life stages of *Giardia intestinalis*, *Trypanosoma gambiense*, *Leishmania donovani* through permanent slides/micro photographs.
- 6. Study of adult and life stages of *Fasciola hepatica*, *Taenia solium* through permanent slides/microphotographs.
- 7. Study of adult and life stages of Ascaris lumbricoides, Ancylostoma duodenale through permanent slides/micro-photographs.
- Project Work: Power point presentation on study of any two non-chordate animals (from Protists to Pseudocoelomates) by student.

#### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	PO Addressed	PSOs Addressed	Cognitive Level
CO 1:	Describe the protozoan reproduction, polymorphism in cnidarians, nervous system in molluses	PO1	PSO 1	R
CO 2:	Apply and evaluate the biological and medicinal importance of various larvae and sponges respectively	РО 3	PSO 1,5	Ap, E
CO 3:	Understand the invertebrate defence and feeding mechanisms	PO 2	PSO 1	U
CO 4:	Analyse and discuss the adaptive radiation, evolution, affinities of a variety of invertebrates	PO 4	PSO 1	An, C

	SEMESTER – 1	
Course name	PRINCIPLES OF ECOLOGY	
Course code	UGZOOCC02	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 72 (Pi	nk) Modifications: 19 (Green)	Change: 91%

After completion of this course the student will be able to

SI. No.	Course Objectives:
1	Remembers and understands the various features and aspects of population ecology, community ecology and ecosystem ecology.
2	Understand and evaluate the components of ecosystem, nutrient and biogeochemical cycles and impact of man on the ecological balance.
3	Understand and evaluate the importance of biodiversity and its conservation
4	Understand and analyse the causes, effects and control environmental pollution and degradation
5	Apply the acquired knowledge to solve the environmental and ecological problems

#### Core T2: PRINCIPLES OF ECOLOGY Unit 1: Introduction to Ecology

History of ecology,

Autecology and synecology. Levels of organization; Laws of limiting factors, Study of physical factors

#### Unit 2: Population

- Unitary and modular populations; unique and group attributes of population- density, natality, rtality, life tables, fecundity tables, survivorship curves, age ratio, sex ratio, dispersal and dispersion, geometric, exponential and logistic growth equation and patterns; r and K life history drategies
- Population regulation density-dependent and independent factors; Population interactions emergence of competition as a central theory experiments of Tansley, Gause and Park, competition exclusion principle, interspecific and intraspecific competitions, LotkaVolterra model; concept of metapopulation (brief idea).

Unit 3: Community

- species richness, dominance, diversity, abundance, vertical and Community characteristics horizontal stratifications;
- Animal's space and resource use, resource partitioning;
- Community and ecosystem: assemblage, guild and community concept, niche concept, ecotone and edge effect;
- Leological succession causes, types, hydrosere and concept of climax

#### Unit 4: Ecosystem

- 10 class Concept of an ecosystem: structure and function; producers, consumers and decomposers; energy flow through the ecosystem; Grazing and detritus food chain; Linear and Y-shaped food chains; food webs; ecological pyramids and ecological efficiencies;
- ecosystems (characteristic features, structure and function). forest, grassland, desert and stems (lake, rivers, marine, estuary); nutrient and biogeochemical cycle with an ample of nitrogen cycle, human modified ecosystems, wetland as an ecosystem service provider

# Unit 5: Applied Ecology

Leology in Wildlife Conservation and Management

I class Pradyol Kumai Malda ASSOCIATE PROFESSOR

AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

4 Credit

2 class

20 class

16 class

#### Unit 6: Environmental Biology 5 class Environmental ethics : Issues and possible solutions. Climate change : global warming, acid rain, ozone layer depletion. Brief idea on El nino, La nina and their consequences. Carbon sequestration and vertical use of space for carbon assimilation. Unit 7: Environmental Pollution / Degradation 6 class Definition, causes, effects and control measures of Air pollution, Water pollution, Soil pollution, Noise pollution, Thermal pollution, Nuclear hazards. Solid waste Management: causes, effects and control measures of urban and industrial wastes;

bioremediation (brief idea). CORE P2: PRINCIPLES OF ECOLOGY Lab 2 Credit

# List of Practical

- 1. Study of life tables and plotting of survivorship curves of different types from the hypothetical / real data provided.
- Determination of population density in a natural/hypothetical community by quadrate method and 2. calculation of Shannon-Weiner diversity index for the same community.
- 3. Study of an aquatic ecosystem: phytoplankton and zooplankton, measurement of area, temperature, turbidity/penetration of light, determination of pH, and dissolved oxygen content (Winkler's method), Chemical Oxygen Demand and free CO2.
- 4. Study of micro arthropods of water and soil samples.

#### **Course Outcomes:**

After completion of this course the student will be able to

Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
Define and demonstrate the components and characistics of population, community and the ecosystem	PO 1, 2	PSO 1, 3	R, U
Analyze, apply and evaluate the various concepts of population and community and relate the impact of man on the ecological balance	PO 4	PSO 3	An, Ap, E
Interpret and analyse the importance of biodiversity and its conservation management	PO 4	PSO 3	U, An
Demonstrate and evaluate the interactions among various environmental parameters	PO 2	PSO 3	U, E
Demonstrate and recommend environmental ethics related issues and management strategies.	PO 6	PSO 3	U, E
	Define and demonstrate the components and characistics of population, community and the ecosystem Analyze, apply and evaluate the various concepts of population and community and relate the impact of man on the ecological balance Interpret and analyse the importance of biodiversity and its conservation management Demonstrate and evaluate the interactions among various environmental parameters Demonstrate and recommend environmental ethics	AddressedDefine and demonstrate the components and characistics of population, community and the ecosystemPO 1, 2Analyze, apply and evaluate the various concepts of population and community and relate the impact of man on the ecological balancePO 4Interpret and analyse the importance of biodiversity and its conservation managementPO 4Demonstrate and evaluate the interactions among various environmental parametersPO 2	AddressedAddressedDefine and demonstrate the components and characistics of population, community and the ecosystemPO 1, 2PSO 1, 3Analyze, apply and evaluate the various concepts of population and community and relate the impact of man on the ecological balancePO 4PSO 3Interpret and analyse the importance of biodiversity and its conservation managementPO 4PSO 3Demonstrate and evaluate the interactions among various environmental parametersPO 2PSO 3

	SEMESTER – II	
Course name	NON-CHORDATES II: COELOMATES	
Course code	UGZOOCC03	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 70% (I	Pink) Modifications: 10% (Green) Total Chan	ge: 80%

After completion of this course the student will be able to

Sl. No.	Course Objectives:
1	Remembers and understands the classification of coelomate invertebrates and the structure, functional biology of these taxonomic categories.
2	Understand and evaluate different vector born diseases and the related life cycles, epidemiology, pathology, diagnosis, symptoms and treatments.
3	Understand and analyse the adaptive radiation, evolution and affinities of a variety of coelomates.
4	Understand and apply the basics of sericulture, apiculture, lac culture and pearl culture.

Core T3 – NON-CHORDATES II: COELOMATES	4 Credit
Unit 1: Introduction to Coelomates	3 class
<ul> <li>Evolution of coelom and metamerism</li> </ul>	
Unit 2 : Annelida	8 class
<ul> <li>General characteristics and classification up to classes.</li> </ul>	
Excretion in Annelida.	
Larval form.	
Unit 3 : Arthropoda	20 class
<ul> <li>General characteristics and classification up to classes.</li> </ul>	
Crustacean larvae.	
· Respiration in Arthropoda : Gills in Prawn; trachea in cockroach; book lung in arachnids	

- Vision in .Arthropoda
- Metamorphosis in Insects
- Social life in bees and termites
- Parasitic Arthropods:
  - Biology, importance and control of Ticks (Soft tick and Hard tick), Mite, Lice, Flea and Bugs.
  - Mosquito as vectors of diseases : Malaria, Filaria, Dengue, DHF and Chikungunya ; causative agents, symptoms and treatment of. Dengue, DHF and Chikungunya.
- Economically beneficial Arthropods:
  - Sericulture: Silks and silkworms; commonly cultivated species in India; economically important products from silkworm; biology & rearing of silkworms; problems- pests & diseases of silkworms as well as host plants; future prospects of sericulture in India.
  - Apiculture: Commonly cultivated species in India; economically important products of apiculture; methods of bee rearing; diseases of honeybee; future prospects of apiculture in India.
  - Lac culture: Types and composition of lac; lac insect and its life history; host plants & lac cultivation; pests and diseases of lac insect as well as host plants; lac extraction; uses of lac; future prospects of lac culture in India.

Unit 4: Onychophora

Predyot Kumar medda 2 class

General Characteristics and Evolutionary significance.	
Unit 5: Mollusca	15 class
<ul> <li>General characteristics and classification up to classes.</li> </ul>	
Respiration in Mollusca	
Nervous system in Mollusca	
<ul> <li>Torsion and detorsion in Gastropoda.</li> </ul>	
Camouflage and inc sac in Cephalopoda.	
<ul> <li>Pearl culture: commonly cultured species of pearl oysters in India, composition of</li> </ul>	nearl culture
methods, freshwater pearls, prospects & concerns of pearl cultivation in India.	pearly called a
Larval forms in Mollusca: Trocophore, Glochidium, Velliger	
Unit 6: Echinodermata	10 class
<ul> <li>General characteristics and classification up to classes.</li> </ul>	
Water vascular system in Echinodermata.	
Larval forms in Echinodermata.	
<ul> <li>Affinities with chordates.</li> </ul>	
Unit 7: Hemichordata	2 class
General characteristics.	
Larval form	
<ul> <li>Relationship with nonchordates and chordates.</li> </ul>	
Core P3: NON-CHORDATES II : COELOMATES Lab	2 credit
List of Practicals	
1. Identification of :	
a. Annelids - Aphrodita, Nereis, Sabella Arenicola, Chaetopterus, Pheretima, Hi	
b. Arthropods - Horseshoe crab, Penaeus, Macrobrachium, Daphnia, Balanu	s, Sacculina,
crab, Eupagurus, centiped, milliped, Bombyx, Periplaneta, termites and honey	bees.
c. Onychophora – Peripatus.	Datamus -
d. Molluscs - Chiton, Pila, Doris, Achatina, Lamellidens, Ostrea, Pinctada, Sep	na, Octopus,
<ul> <li>Nautilus.</li> <li>Echinoderms - starfish, brittle star, sea urchin, sea cucumber, sea lily and feath</li> </ul>	er star 2
Name of specimen, systematic position upto class, and two specimen character	ers
2. Study of digestive system, septal nephridia and pharyngeal nephridia of earthy	vorm(Virtual
demonstration).	and a second of the second

- demonstration).3. T.S. through pharynx, gizard, and typhlosolar intestine of earthworm (virtual demonstration).
- 4. Mount of mouth parts and dissection of digestive system and nervous system of Periplaneta.
- 5. Project Work : Power point presentation on study of any two nonchordate coelomate animals by the student.

# **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Demonstrate and distinguish different coelomate invertebrates and the structural and functional biology of these taxonomic categories		PSO 1	U, An
CO 2:	Illustrate different vector born diseases and the related life cycles, epidemiology, pathology, diagnosis, symptoms and treatments and take part in controlling these diseases.	C	PSO 4	U, Ap
CO 3:	Define, interprete and analyse the adaptive radiation, evolution and affinities of a variety of coelomates	PO 3,	PSO 1	R, U, An
CO 4:	Demonstrate and apply various techniques of sericulture, apiculture, lac culture and pearl culture. Thus create the enterprenureship.	PO 5, 6	PSO 4, 5	U, Ap, C

Badyot Kumar Medda

	SEMESTER – H	
Course name	CELL BIOLOGY	
Course code	UGZOOCC04	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 83%(P	ink) Modifications: 7% (Green)	Total Change: 90%

After completion of this course the student will be able to

SI. No.	Course Objectives:
1	Outline the structures and explain the functions of plasma membrane and all cellular organelles in details.
2	Acquire knowledge about chromosomes and cell divisions, both mitosis and meiosis.
3	Understand the mechanism of cell signalling and cancers.
4	Know how to measure and stain different cell types.

# Core T4 - CELL BIOLOGY

Unit 1: Overview of Cells

# Basic structure of:

\* Prokaryotic and Eukaryotic cells.

\* Viruses, Viroid, Prion and Mycoplasma.

# Unit 2: Plasma Membrane

- Various models and ultra-structure and composition of Plasma Membrane: Lipid Bilayer, Membrane Proteins and their types.
- Transport across membrane: Active and passive transport, Facilitated transport
- Cell junctions: Tight junctions, Gap junctions, Desmosomes.
- · Liposomes, Freeze-etching and freeze fracture technique for membrane study.

# Unit 3: Endomembrane system

- Structure and functions of : Endoplasmic Reticulum, Golgi Apparatus, Lysosomes and Ribosome.
- Protein sorting and mechanisms of vesicular transport.

# Unit 4: Mitochondria, Peroxisome and Centrosome

- Mitochondria: Structure, Semi-autonomous nature, Endosymbiotic hypothesis, functions including Respiratory Chain and Oxidative Phosphorylation.
- Peroxisomes: Structure and functions.
- Centrosome: Structure and functions:

### Unit 5: Cytoskeleton

- Type, structure and functions of cytoskeleton : microtubules, microfilaments, and intermediate filaments
- · Accessory proteins of microfilament and microtubule.
- A brief idea about molecular motors.

#### Unit 6: Nucleus

- Structure of Nucleus: Nuclear envelope, nuclear pore complex, nucleolus and biogenesis of ribosome.
- Chromosome- structure and functions.
- Polytene and lampbrush chromosomes.
- Centromere and telomere.
- · Chromatin: Euchromatin and Hetrochromatin and packaging (nucleosome).
  - PRAdypt Kumar Medda ASSOCIATE PROFESSOR AND HEAD Dept. of Zoology R. K. Mission V.C. College

Rahara, Kol-700118

4 Credit

10 class

4 class

8 class

#### Unit 7: Cell Division

- Cell cycle and its regulation.
- Cancer (role of p53, Retinoblastoma and Ras). ٠
- Cellular reproduction: Amitosis, Mitosis and Meiosis: Basic process and their significance. 4 class

## Unit 8: Cell Signalling

GPCR and Role of second messenger (cAMP)

#### Core P4 - CELL BIOLOGY Lab

List of Practicals

- Preparation of temporary stained squash of onion root tip to study various stages of mitosis. 1.
- Study / preparation of various stages of meiosis from Grasshopper. 2.
- Drawing of ultrastructure of cell and different organelles (from photographs provided). 3.
- Demonstration and description of compound microscope. 4.
- Measurement of size (length/breadth) by micrometry of any cell / protozoan. 5.
- Diversity of eukaryotic cells methylene blue staining of buccal epithelium (human); 6. Leishman staining of mammalian blood cells ; Permeability of plasma membrane - effect of isotonic, hypotonic and hypertonic solutions on mammalian RBC.

#### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Define and demonstrate the structures and functions of plasma membrane and all cellular organelles in details.	PO 1, 2	PSO 2	R, U
CO 2:	Illustrate the structure and functions of endomembrane system and cytoskeleton	PO 2	PSO 2	U
CO 3:	Demonstrate and identify the detail structure of nucleus and compare the functional mechanism of different parts of the nucleus.	PO 2	PSO 2	U, Ap
CO 4:	Elaborate the mechanism of cell signalling and cancers.	PO 2	PSO 2	C
CO 5:	Compare and apply the techniques to measure and stain different cell types.	PO 2, 6	PSO 2, 5	An, E

R= remembering, U = understanding, Ap = applying, An = analysing, E = evaluating, and C = creating

	SEMESTER – III	
Course name	DIVERSITY OF CHORDATA	
Course code	UGZOOCC05	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 63% (1	Pink) Modifications: 7% (Green)	Total Change: 70%

After completion of this course the student will be able to

SI No.	Course Objectives:
1:	Understand the classification, structure, function and biology of chordates of different taxonomic classes.
2:	Outline the origin of chordates
3:	Explain some special topics like zoogeography, metamorphosis, snake bites, migration of birds, parental care of amphibian, echolocation of mammals,
4:	Apply the knowledge of poultry managements and different breeds of domestic animals.

#### **Core T5: DIVERSITY OF CHORDATA**

Unit 1: Introduction to Chordates	2 class
<ul> <li>General characteristics and outline classification of Phylum C</li> </ul>	Chordata.
Unit 2: Protochordata	6 class
<ul> <li>General characteristics and classification of subphylum Uro classes.</li> </ul>	ochordata and Cephalochordata up to
<ul> <li>Retrogressive metamorphosis in ascidians.</li> </ul>	
<ul> <li>Anatomical peculiarities and feeding in Branchiostoma.</li> </ul>	
Unit 3: Origin of Chordata	3 class
• Dipleurula concept and the Echinoderm theory of origin of ch	ordates.
<ul> <li>Advanced features of vertebrates over protochordates.</li> </ul>	
Unit 4: Agnatha	1 class
<ul> <li>General characteristics and classification of cyclostomes up to</li> </ul>	o order
Unit 5: Pisces	11 class
General characteristics and classification of Chondrichthyes a	ind Osteichthyes up to order
<ul> <li>Gill respiration and accessory respiratory organs./</li> </ul>	to order
Osmoregulation	
Swim bladder.	
Parental care	
Migration	
Unit 6: Amphibia	6.1
<ul> <li>General characteristics and classification up to living orders.</li> </ul>	6 class
<ul> <li>Origin of Tetrapoda (Evolution of terrestrial ectotherm)</li> </ul>	
<ul> <li>Metamorphosis : Process and regulation.</li> </ul>	
Parental care	
Unit 7: Reptilia	
General characteristics and classification up to living orders.	7 class
Skull types.	
<ul> <li>Venom apparatus and biting mechanism in snake.</li> </ul>	
	Pradyot Kumar Medda

ASSOCIATE PROFESSOR AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

4 credit

10 class

Unit 8: Aves

- General characteristics and classification up to living order
- Archaeopteryx- a connecting link
- Types of flight; principles and aerodynamics of flight.
- Respiration in bird.
- Migration in birds
- Poultry birds: Fowl & Duck different breeds, their advantages & disadvantages; importance of indigenous breeds. 10 class

#### Unit 9: Mammalia

- General characteristics and classification up to living orders.
- Evolutionary peculiarities of Prototheria.
- Ruminant stomach.
- Echolocation in microbats./
- Adaptive radiation with special reference to locomotory appendages.
- Cattle, goats and lambs: different breeds, their advantages and disadvantages; importance of indigenous breeds.

#### Unit 10: Zoogeography

Zoogeographical realms, Theories pertaining to distribution of animals, Plate tectonic and Continental drift theory, distribution of vertebrates in different realms

#### Core P5 - DIVERSITY OF CHORDATA Lab

#### List of Practical

- 1. Identification of Protochordates : Balanoglossus, ascidian, Branchiostoma (Name of specimen, systematic position up to class and two specimen characters).
- 2. Identification of Agnathans : Petromyzon, Myxine (Name of specimen, systematic position up to class and two specimen characters).
- 3. Identification of Fishes :

Scoliodon, Sphyrna, Pristis, Torpedo, Mystus, Heteropneustes, Labco rohita and Labeo bata, Exocoetus, Echeneis, Anguilla, Hippocampus. Anabas, Flat fish (Name of specimen. systematic position up to subclass and two specimen characters).

Identification of Amphibians:

Bufo, Rana, Hyla, Necturus, Axolotl, Tylototriton, Ichthyophis/Uracotyphlus (Name of Specimen, systematic position up to order and two specimen characters).

- Identification of Reptilians: 5. Sea turtle, Hemidactylus, Varanus, Uromastix, Chamaeleon, Draco, Vipera, Naja, Hydrophis, Crocodylus (Name of specimen, systematic position up to order and two specimen characters). Key for Identification of poisonous and non-poisonous snakes.
- 6. Aves: Study of common birds from different orders.
- 7. Identification of Mammals: Bat (Insectivorous and Frugivorous), Sorex, Funambulus, Loris, Herpestes, Erinaceous (Name of specimen, systematic position up to order and two specimen characters).
- Dissection of brain and pituitary of Tilapia.
- 9. Power point presentation on study of any two chordate animals by students.

### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Define and classify different class of chordates.	PO 1, 2	PSO 1	R, U
	Demonstrate and compare the structure, function and biology of chordates of different taxonomic classes.	PO 2	PSO 1, 2	U, C
	Outline and evaluate the origin of chordates	PO 1	PSO 1	U.E
CO 4:		PO 2	PSO 1, 3	U, An

	SEMESTER – III	
Course name ANIMAL PHYSIOLOGY : CONTROLLING AND COORDINATI SYSTEMS		
Course code	UGZOOCC06	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 67% (1	Pink) Modifications:- Green 17% Total Change: 84%	

After completion of this course the students will be able to

Sl. No.	Course Objectives:	
1	Remember and understand the basics of histology and functions of various tissues.	
2	Understand the structure and physiology of muscles, nerves.	
3	Explain the reproductive systems and distinguish the physiology of male and female reproduction.	
4	Understand and evaluate the histology of endocrine glands and classify hormones, demonstrative their biosynthesis, receptors, mode of molecular actions, physiological function, feedback controls and related disorders.	

## CORE T6: ANIMAL PHYSIOLOGY : CONTROLLING AND COORDINATING SYSTEMS 4 Credit

Unit 1: Basics of Histology	4 class
How to study tissues; preparation of histological slide	s : fixation, mordant, staining. 6 class
Unit 2: Tissues Structure, location, classification and functions of e	
tissue and nervous tissue	principal instact, connective instact, indecting
Unit 3: Bone and Cartilage	4 class
Structure and types of bones and cartilages, Ossification	on, bone growth and resorption
Unit 4: Nervous System	10 class
Structure of neuron, resting membrane potential, Or	rigin of action potential and its propagation
across the myelinated and unmyelinated nerve fibers;	Types of synapse, Synaptic transmission and,
Neuromuscular junction;	
Reflex action and its types - reflex arc; Physiology of	hearing and vision.
Unit 5: Musele	8 class
Histology of different types of muscle; Ultra structure	e of skeletal muscle; Molecular and chemical
basis of muscle contraction;	
Characteristics of muscle twitch; Motor unit, summation	on and tetanus
List G. Deproductive System	8 class
Unitalous of testis and ovary: Puberty, Physiology of I	male and female reproduction; Role of Pineal
aland in reproduction; Estrous and Menstrual cyc	le, Prostrate gland and its role in semen
formation, Methods of contraception in male and fema	le
Unit 7: Endocrine System	20 class
<ul> <li>General idea of endocrine and exocrine systems.</li> </ul>	
literation of andocrine glands - pincal, pituitary,	thyroid, parathyroid, pancreas, adrenal ;
Disconthesis mechanism of action, function and	regulation of hormones secreted by them
(instruction those of testis and overy); Disorders of these	e glands.
<ul> <li>Classification of hormones; Types of hormone delivery</li> </ul>	/ system; Regulation of hormone secretion;
• Classification	Pradyot Kumar Medda
	Naayor Internet
	ASSOCIATE PROFESSOR

AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

- Mode of hormone action, Signal transduction pathways for steroidal and non-steroidal hormones; Hypothalamus (neuroendocrine gland) - principal nuclei involved in neuroendocrine control of anterior pituitary and endocrine system; General idea of feedback mechanism (both positive and negative); Hypthalamo – hypophysial axes – gonadal, adrenal and thyroidal axes.
- Placental hormones
- Role of hormones in homeostasis.
- Molecular Mechanism of Hormone Action:
  - Ligand receptor concept, concept of signal transduction; Types of cell surface receptor mediated signaling as well as subcellular receptor-mediated signaling;
  - Signal transduction pathways of the hormones: Insulin, Glucagon, Adrenalin, T4.
  - General idea of apoptosis.
  - Hormone bioassays RIA and ELISA.
  - Genomics of Hormone action.

#### CORE P6: ANIMAL PHYSIOLOGY: CONTROLLING AND COORDINATING SYSTEMS Lab 2 Credit

#### List of Practical

1. Recording of simple muscle twitch with electrical stimulation (or Virtual)

2. Demonstration of the unconditioned reflex action (Deep tendon reflex such as knee jerk reflex)

3. Preparation of temporary mounts: Squamous epithelium, Striated muscle fibres and nerve cells

4. Study of permanent slides of Mammalian skin, Cartilage, Bone, Spinal cord, Nerve cell, Pituitary, Pancreas, Testis, Ovary, Adrenal, Thyroid and Parathyroid

5. Microtomy: Preparation of permanent slide of any five mammalian (Goat/white rat) tissues (liver, thyroid, kidney, testis, ovary, adrenal and pancreas).

#### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Define and demonstrate the basics of histology and functions of various tissues.	PO 1, 2	PSO 2	R, U
CO 2:	Illustrate the structure and physiology of muscles, nerves.	PO 2	PSO 2	U
CO 3:	Explain the reproductive systems and distinguish the physiology of male and female reproduction.	PO 2, 4	PSO 2	U, An
CO 4:	Demonstrate and evaluate the histology of endocrine glands.	PO 2, 5	PSO 2, 5	U, E
CO 5:	Classify hormones and Explain their biosynthesis, receptors, mode of molecular actions, physiological function, feedback controls and related disorders.	PO 4, 5	PSO 2,4, 5	Ан, Ар
CO 6:	Examine histology different tissues through preparation of temporary and peranent slides	PO 6	PSO 2, 4	An

	SEMESTER – III	
Course name	FUNDAMENTALS OF BIOCHEMISTRY	
Course code	UGZOOCC07	
Number of lectures	105	
Credits	6	
Marks	100	000/
New addition: 63% (I	Pink) Modifications: 25% (Green)	Total Change: 88%

**Course Objectives:** After completion of this course the student will be able to

SI. No.	Course Objectives:		
1	Remembers, understands the basic and fundamental biochemistry of carbohydrates, proteins, lipids and nucleic acids.		
2	Understand the nature, mechanism, and kinetics of enzyme action.		
3	Learn some instrumentation such as microscopy, chromatography, electrophoresis centrifugation, spectrophotometry etc.		
4	Analyse pH, carbohydrates, proteins, lipids and chromatographic separation of amino acids		

# CORE T7: FUNDAMENTALS OF BIOCHEMISTRY

11	Carbolydrates	8 class
Unit 1:	Carbohydrates Structure and Biological importance: Monosaccharides, Disaccharides, Polysaccharides ar	nd,
	Glycoconjugates; Mutarotation, Epimers and Invert sugar.	
		8 class
Unit 2:	Lipids	
•	Classification and properties of Lipids. Structure and significance of physiologically important saturated and unsaturated fatty aci	ds.
•	structure and significance of physiologically important statuted used in the second significance of physiologically important statuted with the second secon	
	Rancidity, Acid value, Iodine number, Reichert Meissl number, Acetyl number.	
•	Rancidity, Acid value, lodine number, Reichert Weissi number, Rectyr number.	
•	Biological importance of Liposomes.	14 class
Unit 3:		
•	Amino acids: Structure, Classification and General properties of $\alpha$ -amino acids; Physiological Amino	gical
	importance of essential and non-essential α-amino acids	1
	Proteins: Bonds stabilizing protein structure; Levels of organization in proteins; Denatura	ation;
	Classification of Proteins including simple and conjugate proteins; Ramachandran plot; St	tructure
	and function of Myoglobin, Haemoglobin, Collagen, Keratin and Elastin; Hill equation and	nd plot of
	Myoglobin and Haemoglobin; Models of allosteric protein behavior; Protein folding and	Ubiquitin
	mediated protein degradation; Protein sequencing.	
•	Immunoglobulins: Basic Structure, Classes and Function, Antigenic Determinants.	
11-14-4-	Nucleic Arids	12 class
	Structure: Purines and pyrimidines, Nucleosides, Nucleondes, Nucleoc acids, Cot Curves:	Base
	Denaturation Renaturation and reassociation kinetics of DNA, Types of DNA (A	, B and Z
	conformations) and RNA, Complementarity of DNA, Hpyo-Hyperchromaticity of DNA.	
Unit 5.	Enzymes	18 class
1000	Nomenclature and classification; Cofactors; Specificity of enzyme action; Isozymes; Mec.	hanism of
DC HI	any action: Enzyme kinetics; Factors affecting rate of enzyme-catalyzed reactions; De	rivation
	- Michaelis-Menten equation, Concept of Km and Vmax, Lineweaver-Burk plot; Multi-s	ubstrate
	reactions: Enzyme inhibition; Allosteric enzymes and their kinetics; Regulation of enzyme	e action.
	<b>Biophysical chemistry of biological systems</b>	25 class
Unit 0.	Introductory idea about the principles and applications of the following techniques :	
•	Pradyst Kumar 1	Medda
	ASSOCIATE PROFESS	SOR
	AND HEAD	
	Dept. of Zoology	
	R. K. Mission V.C. Colle	egø
	Rahara, Kol-700118	

4 credit

- a. Microscopy : Phase contrast, Dark field, Fluorescence, SEM & TEM.
- Chromatography : Paper chromatography, TLC, Affinity chromatography and Gel Filtration chromatography.
- c. Centrifugation : Density gradient, differential and ultracentrifugation.
- d. Electrophoresis : DNA and Protein including immunoelectrophoresis
- e. X-ray crystallography
- f. Spectrophotometry : UV-Visual and IR./
- Application of Radioisotopes in Biology.
- Viscosity and Surface Tension in Biological system.

#### Core P7: FUNDAMENTALS OF BIOCHEMISTRY Lab List of Practical

- 1. Qualitative tests of carbohydrates, proteins and lipids.
- 2. Paper chromatography/Size-exclusion Chromatography of amino acids
- 3. Demonstration of pH meter and buffer preparation
- 4. Action of salivary amylase under optimum conditions
- 5. Effect of pH, temperature and inhibitors on the action of salivary amylase.
- 6. Demonstration of proteins separation by SDS-PAGE.

#### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Define and demonstrate the basic and fundamental biochemistry of carbohydrates, proteins, lipids and nucleic acids.	PO 1, 2	PSO 2	R, U
CO 2:	Understand and apply the nature, mechanism, and kinetics of enzyme action.	PO 2, 4	PSO 2	U, Ap
CO 3:	Demonstrate, apply and evaluate some instrumentation such as microscopy, chromatography, electrophoresis, centrifugation, spectrophotometry etc.	PO 2, 4, 5	PSO 2	U, Ap, E
CO 4:	Analyse and estimate pH, carbohydrates, proteins, lipids and chromatographic separation of amino acids	PO 4, 6	PSO 2, 5	An, C

R= remembering, U = understanding, Ap = applying, An = analysing, E = evaluating, and C = creating

	SEMESTER – IV	
Course name	COMPARATIVE ANATOMY OF VERTEBI	RATES
Course code	UGZOOCC08	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 65% (1	Pink) Modifications: 23% (Green)	Total Change: 88%

After completion of this course the student will be able to

SI. No.	Course Objectives:	
1	Define and understand the structures of different systems such as, integumentary, skeletal, digestive, respiratory, circulatory, urinogenital, nervous and sensory organs in comparative way among the vertebrate groups.	
2	Distinguish the disarticulated skeleton of many vertebrates.	
3	Understand and evaluate the skeletal modifications in vertebrates.	
4	Understand the evolution of urinogenital ducts, heart and aortic arches.	

## Core T8: COMPARATIVE ANATOMY OF VERTEBRATES

4 credit

Unit 1: Integumentary System	8 class
<ul> <li>General structure &amp; functions of integument; integumental d</li> </ul>	
scales, scutes, carapace and plastron of reptiles; feathers of b	ords; hair, horn, antler, claw and nail
of mammals).	
Unit 2: Skeletal System	8 class
<ul> <li>Overview of axial and appendicular skeleton, Jaw suspensori</li> </ul>	um, Visceral Arches,
<ul> <li>Comparative anatomy of vertebrae.</li> </ul>	
Unit 3: Digestive System	8 class
<ul> <li>Alimentary canal and associated glands; dentition.</li> </ul>	
Unit 4: Respiratory System	8 class
<ul> <li>Skin, gills, lungs and air sacs; Accessory respiratory organs.</li> </ul>	
Unit 5: Circulatory System	8 class
<ul> <li>General plan of circulation; evolution of heart and aortic arch</li> </ul>	es.
Unit 6: Urinogenital System	6 class
<ul> <li>Succession of kidney, Evolution of urinogenital ducts, Types</li> </ul>	of mammalian uteri.
Unit 7: Nervous System	8 class
<ul> <li>Comparative account of brain;</li> </ul>	
<ul> <li>Autonomic nervous system, Spinal cord, Cranial nerves in an</li> </ul>	phibians and mammals.
Unit 8: Sense Organs	6 class
Classification of receptors; Brief account of visual and auditory recep	tors in man
2015	
Core P8: COMPARATIVE ANATOMY OF VERTEBRATES	lab
List of Practicals	2 credit
List of Practicals 1. Study of placoid, cycloid and etenoid scales through permanent slic	les / photographs
Disortigulated skeleton of Frog. Varanus/Caloles, FowI/Figeon, Ra	bbh/Guineapig
[including skull, atlas, axis, synsacrum (pigeon), pygostyle (pig	rdle bound formula (since all
Including skull, atlas, akis, dyna fibula/tibio-tarsus and fibula, gin ulna, femur, tibio-fibula/tibia and fibula/tibio-tarsus and fibula, gin	the bones, furcula (pigeon)].
3. Carapace and plastron of turtle /tortoise (photographs)	Pradyot Kumar Meda ASSOCIATE PROFESSOR
<ol> <li>Carapace and plasmon of three vortices of the carnivorous animal</li> <li>Mammalian skulls: One herbivorous and one carnivorous animal</li> </ol>	Pradurot Rumia

Course code	UGZOOCC10
Number of lectures	105
Credits	6
Marks	100
New addition: 72% (I	

**Course Objectives:** After completion of this course the student will be able to

SI. No.	Course Objectives:
1	Remember and understand the basics mechanisms and pathway of Metabolism.
2	Remembers, understands the metabolism of carbohydrates, lipids and proteins in details.
3	Understand and evaluate about oxidative phosphorylation and redox reactions.
4	Estimate total protein and detect SGOT and SGPT or GST and GSH in serum/ tissue.
5	Understand and evaluate enzymatic activity.

Core T10: BIOCHEMISTRY OF METABOLIC PROCESSES Unit 1: Overview of Metabolism	4 credit
Catabolism vs Anabolism, Stages of catabolism,	10 class
<ul> <li>Compartmentalization of metabolic pathways,</li> </ul>	
Shuttle systems and membrane transment	
ondere systems and memorane transporters:	
and as Energy currency of cert, coupled reactions.	
control for the during equivalents and collactors.	
Intermediary metabolism and regulatory mechanisms	
Unit 2: Carbohydrate Metabolism	16 class
<ul> <li>Sequence of reactions and regulation of glycolysis,</li> </ul>	10 class
Citric acid cycle,	
<ul> <li>Phosphate pentose pathway,</li> </ul>	
<ul> <li>Gluconeogenesis,</li> </ul>	
<ul> <li>Glycogenolysis and Glycogenesis</li> </ul>	
Unit 3: Lipid Metabolism	
<ul> <li>β-oxidation and omega -oxidation of saturated fatty acids with evatoms;</li> </ul>	14
atoms;	en and odd number of carbon
<ul> <li>Biosynthesis of palmitic acid;</li> </ul>	
Ketogenesis	
Unit 4: Protein Metabolism	
<ul> <li>Catabolism of amino acids: Transamination, Deamination,</li> </ul>	10
• Urea cycle;	
<ul> <li>Fate of C-skeleton of Glucogenic and Ketogenic amino acids</li> </ul>	
Unit 5: Oxidative Phosphorylation	
Redox systems;	10 class
<ul> <li>Review of mitochondrial respiratory chain,</li> </ul>	- v cinaa
<ul> <li>Inhibitors and un-couplers of Electron Transport System</li> </ul>

	SEMESTER – V	
Course name	MOLECULAR BIOLOGY	
Course code	UGZOOCC11	
Number of lectures	105	
Credits	6	
Marks	100	020/
New addition: 66% (	Pink) Modifications: 27 (Green)	Total Change: 93%

After completion of this course the student will be able to

SI. No.	Course Objectives:
1	Acquire knowledge about the replication, transcription, translation.
2	Understand the post transcriptional and post translational modifications, gene regulation, DNA repair mechanisms and
3	Elaborate various molecular tools and techniques like PCR, southern, northern and western blotting, recombinant DNA technology etc.
4	Learn various tools and techniques related to bacterial microbiology, some aspects of applied microbiology and diseases related to microbiology.

# Core T11- MOLECULAR BIOLOGY

#### Unit 1: Nucleic Acids

.

Salient features of DNA and RNA

- DNA structure: DNA double helix (Watson and Crick model)
- DNA and RNA as genetic material
- c-value paradox, Chargaff's rule

# Unit 2: DNA Replication

 Mechanism of DNA replication in Prokaryotes and Eukaryotes and their differences; Semiconservative, bidirectional and discontinuous replication; RNA priming; replication of circular and linear ds-DNA; Replication of telomeres; replication slippage with reference to Huntington's disease. 8 class

# Unit 3: Transcription

 RNA polymerase (I, II, III) and transcription Unit; Mechanism of Transcription in prokaryotes and eukaryotes and their differences ; Transcription factors & Activators, Repressors, Motils (only Basic helix loop helix [BHLH];Leucine zipper - definition and example); synthesis of rRNA, tRNA and mRNA . 5 class

# Unit 4: Post transcriptional Modifications and Processing of Eukaryotic RNA

Capping and Poly A tail formation in mRNA; Split genes: concept of introns and exons, splicing mechanism, alternative splicing, exon shuffling, and RNA editing; Processing of tRNA Structure of globin mRNA

# Unit 5: Translation

- Mechanism of protein synthesis in prokaryotes, Ribosome structure and assembly in prokaryotes, fidelity of protein synthesis, aminoacyl tRNAsynthetases and charging of tRNA; Proteins involved in initiation, clongation and termination of polypeptide chain.
  - Genetic code, Degeneracy of the genetic code and Wobble Hypothesis; Inhibitors of protein synthesis; Differences between prokaryotic and eukaryotic translation.

# Unit 6: Gene Regulation

Regulation of transcription in prokaryotes: lac operon and trp operon;

6 class

8 class

Pradyof Kumar Medda

	SEMESTER – V	
Course name	PRINCIPLES OF GENETICS	
Course code	UGZOOCC12	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 60% (I	Pink) Modifications: 10% (Green)	Total Change: 70%

After completion of this course the student will be able to

Sl. No.	Course Objectives:		
1	Learn the fundamental genetics like Mendelian and Non Mendelian inheritances, linkages, mutations.		
2	Understand the sex determination of various animals, extrachromosomal inheritances, transposable genetic elements etc.		
3	Understand various aspects of human genetics by covering chromosomal aberrations, gene mutation, etc.,		
4	Understand the various aspects of biostatistics such as central tendency, t-test, chi-square, ANOVA, correlations and regression.		
5	Inspect the Mendelian laws and gene interactions, draw linkage maps and examine chromosomes.		

#### Core T12 – PRINCIPLES OF GENETICS

#### Unit 1: Mendelian Genetics and its Extension

- Principles of inheritance, Principles of segregation and independent assortment and their chromosomal basis, Test cross, Application of laws of probability to Mendelian inheritance.
- Cis-trans test for allelism; Incomplete dominance and co-dominance; Epistasis; Multiple alleles; Isoallele: White eye locus in Drosophila; Complex locus: Lozenge locus in Drosophila; Lethal alleles, Pleiotropy, Penetrance and expressivity.
- Phenocopy, Sex-linked, sex- influenced and sex-limited inheritance; Polygenic inheritance with . suitable examples; simple numericals.

## Unit 2: Linkage, Crossing Over and Chromosomal mapping

- Linkage and Crossing Over, Complete and Incomplete linkage.
- · Experiments by Bridges, molecular mechanisms of crossing over including models of recombination, Recombination frequency as a measure of linkage intensity ; two factor and three factor crosses, Interference and coincidence,
- Somatic cell hybridization.
- Cytogenetic evidence of crossing over in Drosophila by Stern's experiment,

#### Unit 3: Mutations

- 7 class • Types of gene mutations (Classification): transition, transversion, frameshift, nonsense, missense, silent, hypomorphic, null, lethal, forward, backward, suppressor, enhancer,
- Chromosomal aberrations in number and structure (classification with one suitable example of each); Nondisjunction.
- Molecular basis of mutations in relation to UV light and chemical mutagens (ionizing radiation, 5-• BU, EMS.), Detection of mutations: CLB method, attached X method .

# Unit 4: Sex Determination

Sex chromosome systems: XX/XO, XX/XY, ZZ/ZW and haploidy/diploidy types.

8 class

Pradyst Kumpa Medda ASSOCIATE PROFESSOR

AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

# 4 Credit

10 class

10 class

- Sex determination in Drosophila.
- Sex determination in human.
- Dosage compensation in :
  - a. Drosophila: Hyper activation of  $\partial X$  by msl, mle and roXRNA followed by histone Ac16 Acetylation.
  - b. Human: Inactivation of  $\Im X$  by XIST RNA followed by DNA methylation

- Environmental sex determination in turtle, crocodile and limpet. 5 class **Unit 5: Human Genetics**  Karyotype, banding, nomenclature of chromosome subdivisions. Genetic disorders : Chromosomal aneuploidy (Down, Turner and Klinefelter syndromes) Chromosome translocation (chronic myeloid leukemia) and deletion ( cat cry syndrome) Gene mutation (cystic fibrosis). Prader-Willi and Angelman syndrome. Multifactorial (Diabetes mellitus). 4 class Unit 6: Extra-chromosomal Inheritance Criteria for extra chromosomal inheritance, Antibiotic resistance in Chlamydomonas, Mitochondrial mutations in Saccharomyces, Infective heredity in Paramecium and Maternal effects, Kappa particle in Paramoecium, Shell spiralling in snail Mitochondrial inheritance and diseases (only brief) Cp-DNA and its mutation in leaf variegation. 5 class Unit 7: Recombination in Bacteria and Viruses Conjugation, Transformation, Transduction, Complementation test in Bacteriophage. 5 class Unit 8: Transposable Genetic Elements Transposons (DNA and Retro-transposons). Ac-Ds elements in maize . P and copia elements in Drosophila, Transposons in humans: LINE, SINE, Alu 6 class **Unit 9 : Biostatistics**  I. Importance of Statistics in Biology. 2. Graphical representation of data - Bar chart, Histograms, Scatter plots, Pie charts; Frequency polygon. 3. Grouped, ungrouped, Discrete and Continuous variables - examples. 4. Mean, Mode and Median. 5. Standard deviation, Variance and Standard error. 6. Simple Correlations and Regression analysis. 7. Analysis of Variance (one way). 8. Chi-square test. 9. Student's t-test (paired and unpaired). Core P12 – GENETICS Lab List of Practical 1. To study the Mendelian laws and gene interactions.
  - 2. Chi-square analyses using seeds/beads/Drosophila. 3. Linkage maps based on data from conjugation, transformation and transduction.
  - 4. Linkage maps based on data from Drosophila crosses.

  - 5. Study of human karyotype (normal and abnormal).
  - 6. Pedigree analysis of some human inherited traits. 7. Identification of various stages of mitosis from permanent slides (onion root tip).
  - 8. Study / preparation of various stages of meiosis from Grasshopper.

	SEMESTER – VI	
Course name	DEVELOPMENTAL BIOLOGY	
Course code	UGZOOCC13	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 69% (I	Pink) Modifications: 9% (Green)	Total Change: 78%

After completion of this course the student will be able to

Sl. No.	Course Objectives:
1	Understand the historical perspective and basic concepts of developmental biology
2	Learn the different aspects of early, late and post embryonic developments.
3 Acquire knowledge about implications of developmental biology in various fields, s teratogenesis, stem cell biology, in vitro fertilization, cryopreservation, cord blood tr etc.	
4	Inspect the developmental stages, different sections of placenta.

#### **Core T13 – DEVELOPMENTAL BIOLOGY**

#### Unit 1: Introduction

 Historical perspective and basic concepts: Phases of development, Cell-Cell interaction, Pattern formation, Differentiation and growth, Differential gene expression, Cytoplasmic determinants and asymmetric cell division.

### Unit 2 : Early Embryonic Development

- Gametogenesis: Spermatogenesis & Oogenesis.
- Ultra structure of sperm and ovum in sea urchin and mammals.
- Types of eggs and egg membranes
- Fertilization in Sea urchin (external) and mammals (internal).
- Cleavage: Cleavage plane, types, role of yolk in cleavage; cleavage process in *C. elegans*, and frog (*Xenopus*) and chick; Types of Blastula.

# Fate maps (including techniques).

- Morphogenetic movements: Types and examples.
- Gastrulation: Process in C. elegans, frog (Xenopus) and chick.
- Embryonic induction and organizers (with Speman-Mangold experiment).

# Unit 2 : Late Embryonic Development

### • Fate of germ layers

- Formation and function of Extra-embryonic membranes in birds (chick).
- Implantation of embryo in human
- · Placenta: Structure (Rabbit), types, examples and functions,

# Unit 3 : Post Embryonic Development

- Metamorphosis: Changes, hormonal regulations in amphibians and insects;
- Regeneration: Modes of regeneration, epimorphosis, morphallaxis and compensatory regeneration (with one example each);
- Ageing: Concepts and Theories
- Development of eye in chick.

# Unit 4 : Implications of Developmental Biology

Teratogenesis: Teratogenic agents and their effects on embryonic development;

10 class

15 class

10 class

Pradyot Kumpa Medda ASSOCIATE PROFESSOR AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

# 4 credit 3 class

22 class

- Embryonic Stem Cells (ESC) and Adult Stem Cells (ASC)
- Cryopreservation of gametes and embryo.
- In vitro fertilization,
- Amniocentesis
- Umbilical Cord Blood: present importance and future prospects.

# Core P13 : DEVELOPMENTAL BIOLOGY Lab

### **List of Practical**

- Study of whole mounts and sections of developmental stages of frog through permanent slides: Cleavage stages, blastula, gastrula, neurula, tail-bud stage, tadpole (external and internal gill stages).
- 2. Study of whole mounts of developmental stages of chick through permanent slides: 24, 48, 72, and 96 hours of incubation.
- 3. Study of the developmental stages and life cycle of butterfly from stock culture.
- 4. Study of eggs and tadpoles of frog from collected or preserved material.
- 5. Study of different sections of placenta (photomicrograph/ slides).
- 6. Study of the developmental stages and life cycle of Drosophila from stock culture.
- 7. Project report on Drosophila culture/chick embryo development.
- 8. Egg.

### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Define and demonstrate the historical perspective and basic concepts of developmental biology	PO 1, 2	PSO 2	R, U
CO 2:	Explain and compare the different aspects of early, late and post embryonic developments.	PO 2, 5	PSO 2	An, E
CO 3:	Apply and adapt the knowledge of developmental biology in various fields, such as in teratogenesis, stem cell biology, in vitro fertilization, cryopreservation, cord blood transfusion etc.		PSO 2, 5	Ap, C
CO 4:	Inspect the developmental stages, different sections of placenta, .	PO 5	PSO 2	An
CO 5:	Compose study report on Drosophila culture and chick embryonic development	PO 4, 6	PSO 5	C

R= remembering, U = understanding, Ap = applying, An = analysing, E = evaluating, and C = creating

	SEMESTER – VI	
Course name	EVOLUTIONARY BIOLOGY	
Course code	UGZOOCC14	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 52% (I	Pink) Modifications: 32% (Green)	Total Change: 84%

After completion of this course the student will be able to

Sl. No.	Course Objectives:	
1	Learn various evolutionary concepts and historical perspective about evolution.	
2	Understand the importance and implication of the evidences of evolution.	
3	Understand the population genetics and evaluate the evolutionary forces and its impact.	
4	Understand the origin and evolution of man and draw phylogenetic trees	

### Core T14 - EVOLUTIONARY BIOLOGY

Unit 1:	: Introduction	2 class
•	Life's Beginnings: Chemogeny, RNA world, Biogeny	
•	Evolution of eukaryotes	
Unit 2	: Theories of Evolution	4 class
•	Historical review of Evolutionary concepts: Lamarckism, Darwinism and Neo Darwinisr	17
Unit 3:	: Evidences of Evolution	10 class
•	Evidences of Evolution: Fossil record (types of fossils, transitional forms, geological evolution of horse,	time scale,
•	Molecular universality of genetic code and protein synthesising machinery, three doma neutral theory of molecular evolution, molecular clock ,example of globin gene family, r	ins of life, RNA/cvt c
	Punctuationism and gradualism mode of evolutionary changes	a a soje e
	Adaptationism versus Pleuralism	
Unit 4:	Variations	4 class
	Sources of variations: Heritable variations and their role in evolution	
Unit 5:	Population Genetics and Evolutionary Forces	18 class
•	Population genetics: Hardy-Weinberg Law (statement and derivation of equation, app law to biallelic population); Evolutionary forces upsetting H-W equilibrium	olication of
	Natural selection: concept of fitness, selection coefficient, derivation of one unit of selection	ection for a
	dominant allele, genetic load, mechanism of working, types of selection, density	-dependent
	selection, heterozygous superiority, kin selection, adaptive resemblances, sexual selectio	n.
•	Genetic Drift : mechanism, Founder's effect and bottleneck phenomenon	
•	Role of Migration and Mutation in changing allele frequencies.	
Unit 6:	Product of evolution	10 class
٠	Micro evolutionary changes (inter-population variations, clines, races)	
•	Species concept (Biological species concept, subspecies, Polytypic species, Sibling s	pecies and
	Ring species), Isolating mechanisms, modes of speciation—allopatric, sympatric,	
•	Adaptive radiation / macroevolution (exemplified by Galapagos finches)	
Unit 7:	Extinctions	2 class
•	Extinctions, Back ground and mass extinctions (causes and effects), detailed examp	ole of K-T
	extinction. Pradyst Kum	

ASSOCIATE PROFESSOR AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

4 Credit

### **Unit 8: Human Evolution**

- Origin and evolution of man; Unique hominin characteristics contrasted with primate
- Characteristics: primate phylogeny from Dryopithecus leading to Homo sapiens;
- Molecular analysis of human origin.

## Unit 9: Phylogenetic trees

Phylogenetic trees, Multiple sequence alignment, construction of phylogenetic trees, interpretation of trees.

# Core P14 – EVOLUTIONARY BIOLOGY Lab

### List of Practical

- 1. Study of fossils from models/pictures.
- 2. Study of homology and analogy from suitable specimens.
- 3. Study and verification of Hardy-Weinberg Law by chi square analysis.
- 4. Study of evolution of ecosystem from models/pictures.
- 1. 5.Demonstration of role of natural selection and genetic drift in changing allele frequencies using simulation studies
- 5. Graphical representation and interpretation of data of height/ weight of a sample of 100 humans in relation to their age and sex.

#### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Learn various evolutionary concepts and historical perspective about evolution.	PO 1	PSO 2,	R
CO 2:	Demonstrate the importance and implication of the evidences of evolution.	PO 2, 3	PSO 2, 3	Ap
CO 3:	Explain the population genetics and evaluate the evolutionary forces and its impact.	PO 2, 5	PSO 2, 3	U
CO 4:	Illustrate the origin and evolution of man and draw phylogenetic trees	PO 2, 6	PSO 2, 4	An, C
CO 5:	Recall various evolutionary concepts and historical perspective about evolution.	PO 1, 2	PSO 2, 3, 6	E. Ap
CO 6:	Summerise the importance and implication of the evidences of evolution.	PO 2, 6	PSO 6	Ар

### DISCIPLINE SPECIFIC ELECTIVES (DSE)

	SEMESTER – V	
Course name	IMMUNOLOGY	
Course code	UGZOODSE01	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 60% (I	Pink) Modifications: 27% (Green)	Total Change: 87%

#### **Course Objectives:**

After completion of this course the student will be able to

Sl. No.	Course Objectives:	
1	Remembers, understands the structures and function of immune cells, immunoglobulins, antigens and their interactions with antibodies.	
2	Understand the MHC molecules, cytokines, hyper sensitivity reactions and cellular mode or immunity development.	
3	Understand the immune diffusion technique and ELISA	
4	Understand the histology of spleen, thymus and lymph nodes and analyse the bloodcells, blood groups and immune reactions	

### SEM V : DSE 1 - IMMUNOLOGY

### DSE1 T : IMMUNOLOGY

#### Unit 1: Overview and Basics

- Historical perspective of Immunology.
- Evolution of immune system.
- Cells and organs of immune system.
- Primary and secondary lymphoid organs.
- Innate and adaptive immune system : Anatomical barriers, Inflammation, Cell and molecules involved in innate immunity; Adaptive immunity (Cell mediated and humoral); Passive : Artificial and natural immunity; Active : Artificial and natural immunity; Immune dysfunctions (brief account of autoimmunity with reference to Rheumatoid arthritis and tolerance, AIDS).
- Immunity of invertebrates.

#### Unit 2: Antigens

Antigens, Immunogens, Antigenicity, Antigen processing and presentation; haptens, adjuvants, epitopes.

### Unit 3: Immunoglobulins

- Basic structure of immunoglobulins, classes and functions,
- Antigen antibody interactions,
- Immunoassays (ELISA and RIA), Polyclonal sera.
- Isotype, ideotype and allotype of antibodies.
- VDJ recombination and allied process for generating antibody diversity (brief idea).
- Hybridoma technology use in monoclonal antibody production.

## Unit 4: Major Histocompatibility Complex

- Structure and function of MHC molecules with special reference to class 1 and class 11.
- Endogenous and exogenous pathways of antigen processing and presentation.

# Unit 5: Complement System, Cytokines and Hypersensitivity

- Soluble mediators and effectors of immune response.
- 15 class PRAdyot KUMAR Medda ASSOCIATE PROFESSOR AND MEAD Dept. of Zoology R. K. Mission V.C. College

Rahara, Kol-700118

3 class

4 credit

8 Class

14 class

5 class

- Complement systems classical, alternative and lectin pathway; process of complement mediated damage evasion; complement system diseases.
- Sources, targets and functions of Cytokines with reference to IL1 to IL14; Interferon α, β, γ; TNF α and TGF β; Therapeutics cytokines.
- Hypersentivity –types, classification, mode of damage, opsonization.

# Unit 6: Cellular immune response

- B cells : differentiations, activation, proliferation and response; structure of B cell receptors.
  T cells: types and functions; differentiation, activation, proliferation and response; Structure and function of T cell receptor complex.
- T cell B cell interactions.
- Various types of vaccines.
- Autoimmune diseases.

### DSE1 P: IMMUNOLOGY Lab

#### List of Practical

- 1. Histological study of spleen, thymus and lymph nodes from slide/photograph./
- 2. Staining and study of mammalian blood film for immunocompetent cell.
- 3. Demonstration of Antigen antibody reaction by immunodiffusion and sheep RBC WBC reaction.
- 4. ABO blood group determination.
- 5. Demonstration of ELISA.

#### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Define and demonstrate the structures and function of immune cells, immunoglobulins, antigens and their interactions with antibodies.		PSO 2	R,U
CO 2:	Demonstrate and explain the MHC molecules, cytokines, hyper sensitivity reactions and cellular mode of immunity development.	PO 2	PSO 2	U, E
CO 3:	Compare and elaborate the cellular immune response	PO 2, 5, 6	PSO 2, 5	An, C
CO 4:	Understand and identify the histology of spleen, thymus and lymph nodes and analyse the bloodcells, blood groups and immune reactions	PO 2, 4	PSO 2, 5	U, Ap. An
CO 5:	Demonstrate and apply immune diffusion technique and ELISA	PO 2, 3	PSO 2, 5	U, Ap

R= remembering, U = understanding, Ap = applying, An = analysing, E = evaluating, and C = creating

	SEMESTER – V
Course name	Animal Behavior and Chronobiology
Course code	UGZOODSE02
Number of lectures	105
Credits	6
Marks	100
New addition: 50% (I	Pink) Modifications: 38% (Green) Total Change: 88%

After completion of this course the student will be able to

CI 11	and the dole to		
SI. No.	Course Objectives:		
1	Remembers, understands the details about patterns of behaviours, survival strategies, social and cooperative behaviours.		
2	Understand the design of signals and its application in ecology and evolution		
3	Understand and evaluate the chronobiology		
4	Understand nesting habits of animals, analyse the ethogram and prepare a short report on behavioural activities of animals		

## SEM V: DSE-2A - ANIMAL BEHAVIOR AND CHRONOBIOLOGY

#### DSE 2 T – ANIMAL BEHAVIOUR AND CHRONOBIOLOGY Unit 1: Introduction to Animal Behaviour

- Origin and history of Ethology

Brief profiles of Karl von Frisch, Ivan Pavlov, Konrad Lorenz, NikoTinbergen

- Tinbergen's 4 questions of animal behavior (Proximate and Ultimate Causes)
- Unit 2: Patterns of Behaviour
  - Stereotyped Behaviours (Orientation, Reflexes); Individual behavioural patterns.
  - FAP and Code breaking
  - Instinct versus Learned Behaviour; Associative learning .
  - Classical and operant conditioning
  - Habituation, Imprinting.

### Unit 3: Social and Sexual Behaviour/

- Social Behaviour: Concept of Society; Altruism; Kin Selection and Hamilton's Rule, Social Organization in lion, langur, naked mole rat, honey bee, termite and army ants. Roosting, Lek and choruses behavior
- Sexual Behaviour: Asymmetry of sex; Sexual dimorphism; Mate choice and mating system (polyandry and polygyny), Intrasexual selection and conflict (male rivalry); Intersexual selection and conflict (female choice); Handicap Hypothesis; Sexual conflict in parental care,

### **Unit 4: Animal Survival Strategies**

- Optimal Model Behaviour.
- Predator versus prey: Evolutionary Arm's race
- Living in groups (advantages and disadvantages)
- Mutualism, Reciprocity (Spawning in black helmet fish, Regurgitation in vampire bat and Alliances in primates)
- Prisoner's Dilemma, Selfish genes
- Optimality model and ESS, Group Selection
- Pseudopregnancies, Use of Mating plug strategy
- Multiple mating

Unit 5: Cooperation and Helping in Birds, Mammals and Fishes

Pradyot Class Kumar Medda ASSOCIATE PROFESSOR AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

### 14 Class

6 Class

4 credit

4 Class

10 Class

10 Class

- Genetic predisposition and ecological constraints
- Helping in birds (Florida Scrub Jays, bee eater, pied kingfisher)
- Helping in mammals ( Belding's ground squirrel, lion)
- Helping in fishes: (Anemone fish)

## Unit 6: Design of Signals: Ecology and Evolution

- Ecological constraints and communication
- Communication in ants, birds and primate calls, pheromones
- Signals modified during evolution (ritualization- manipulation, honesty)
- Honest signaling: Thomson's gazelles
- Manipulative signaling: mantis, shrimps
- Biological Colouration, Mimicry,

### Unit 7: Chronobiology

- Types and characteristics of biological rhythms: Short- and Long term rhythms
- Circadian rhythms; circatidal rhythms, circalunar rhythms and circannual rhythms.
- Concept of synchronization and masking.
- Photic and non-photic zeitgebers; Photoperiod and regulation of seasonal reproduction of vertebrates; Role of melatonin.

### DSE 2 P – ANIMAL BEHAVIOUR AND CHRONOBIOLOGY Lab

#### List of Practical

- 1. To study nests and nesting habits of the birds and social insects, roosting behavior.
- 2. Preparation of ethogram from local animal watching, Ad-libitum study of animals.
- 3. Rearing of butterflies to document the life cycle of the species.
- 4. To study the geotaxis behavior in earthworm.
- Visit to Forest/ Wild life Sanctuary/Biodiversity Park/Zoological Park to study behavioural activities of animals and prepare a short report.

#### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Define and demonstrate the details about patterns of behaviours, survival strategies, social and identify the cooperative behaviours.		PSO 1, 3	R, U, Ap
CO 2:	Explain the design of signals and analyse its application in ecology and evolution	PO 2, 3, 5	PSO 1, 3	U, An
CO 3:	Illustrate and evaluate the chronobiology	PO 3, 5	PSO 1, 3	U, E
CO 4:	Compare nesting habits of animals, analyse the ethogram and prepare a short report on behavioural activities of animals	PO 5, 6	PSO 1, 5	An, C

R= remembering, U = understanding, Ap = applying, An = analysing, E = evaluating, and C = creating

	SEMESTER – V	
Course name	POLLINATION BIOLOGY	
Course code	UGZOODSE03	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 100%	(Pink) Modifications: 0% (Green)	Total Change: 100%

After completion of this course the student will be able to

Sl. No.	Course Objectives:		
1	Remembers, understands and apply the knowledge about flowering of plants in natural environment and its relation with pollination, and above all ecological impact.		
2	Understand and evaluate know about the basic principle and modes of pollination, types and identification of flower visitors, pollinator diseases, colour vision capabilities of insect pollinators.		
3	Understand and evaluate the Importance of Pollination and threats to Pollinators and conservation of pollinators		
4	Understand and analyse Gymnosperms & Angiosperms pollination systems		
5	Dissect, identify and draw the flowering plants and mouthparts of the pollinating insects		

### **DSE 3 T: POLLINATION BIOLOGY**

4 credit

### **Basic principle of Pollination or Pollination in general**

#### Introduction with examples

### **History of Pollination**

- · Fossil evidence, First evidence of Man's involvement in Pollination, Indian scenario
- Necessity / Significance / Importance of Pollination Asexual / Vegetative Reproduction vs. Sexual Reproduction – transformation from Mitosis to Meiosis – importance of Meiosis – Haploid to Diploid cycle with Recombination DNA.

### **Evolution of Pollination**

Transition from Gymnosperm to Angiosperm

### Pollinating Agents (P A) in brief -

 Pollinating agents (Wind, air, insects & Other animals) Insect pollinators (Morphology of a typical insects, classification, distinguishing characters, specialized structures for carrying pollen)

### Pollination in Gymnosperms -

Characteristics and modalities – mostly air pollinated but Entomophily also.

## Pollination in Angiosperms -

Characteristics, Unisexual / Bi-sexual Flowers – their adaptations.

# Pollination Types - Self Pollination

- Autogamy and Geitonogamy What it is Characteristics of Self Pollinated flowers, with examples – Merits and De-merits of Self pollination
- Cross Pollination (Xenogamy) -
  - What it is Characteristics of Cross Pollinated flowers, with examples Merits and De-merits of Cross Pollination.

# Co-evolution of Angiosperms and Entomofauna -

- History and Diversity.
- Plant Pollinator Specificity Case Studies -
  - Pollination in Rafflesia, Pollination in Ophrys, Pollination in Ficus (Fig).

Pollinator threats & Conservation:

Pradyst Kumer Medda

## Pollinator diseases, Habitat Loss & Others

## The Plants & Flowers

- Gymnosperm & Angiosperm, Functional floral morphology and phenology, Pollen morphology ٠ and NPC classification, Flower and floral parts, Plant Reproduction. Reproductive strategies and innovations. Mechanisms of pollen dispersal. Major plant lineages and the origin of the Angiosperms. Floral Evolution. The evolution of the flower and floral diversity. Floral Advertisement: Visual, Odorant. Nectar, Pollen, and other floral rewards.
- Dispersal of fruit and seed, Application of palynology: Melissopalynology & Aeropalynology. DSE 3 P - POLLINATION BIOLOGY Lab

2 credit

- i. Dissection, identification and drawing of reproductive organs of the flowering plants (Entomophilous, Ornithophilous etc.)
- ii. Dissection, identification and drawing of mouthparts of the pollinating insects (Coleoptera, Lepiodptera, Diptera, Hymenoptera & Hemiptera).
- iii. Basic Study of pollen morphology (Shape, type of aperture, polar outline, surface pattern etc.)
- iv. Review work on the pollination biology

#### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level	
CO 1:	Define, demonstrate and apply the knowledge about flowering of plants in natural environment and its relation with pollination, and above all ecological impact.	PO 1, 2, 3	PSO 1, 3	R, U, Ap	
CO 2:	Illustrate and evaluate the basic principle and modes of pollination, types and identification of flower visitors, pollinator diseases, colour vision capabilities of insect pollinators.	PO 3	PSO 1,3, 5	U, E	
CO 3:	Explain and analyse the importance of pollination and threats to pollinators and conservation of pollinators	PO 5, 6	PSO 1, 3, 4	U, An	
CO 4:	Demonstrate and analyse Gymnosperms & Angiosperms pollination systems	PO 3	PSO 5	U, An	
CO 5:	Evaluate and prepare report on the relationship between the flowering plants and mouthparts of the pollinating insects	PO 3, 6	PSO 1, 5	E, C

Marks	100	
New addition: 100%	(Pink) Modifications: 0% (Green)	Total Change: 100%

After completion of this course the student will be able to

Sl. No.	Course Objectives:		
1	Remember and understand the basic concepts in bioinformatics and molecular biology.		
2	Apply various bioinformatics tools to analyse various biological data.		
3	Identify research questions and design insilico experiments.		
4	Solve research problems.		

#### DSE 4 T – PROJECT WORK (BIOINFORMATICS AND MOLECULAR BIOLOGY) 4 credit

Design and perform in silico experiments include but are not limited to the following topics

- 1. Cloning and restriction studies, PCR and Primer Design
- 2. Structure Prediction or Modeling of Proteins, Structural analysis
- 3. Comparative Genomics, Genome analysis and annotation
- 4. Nucleotide sequence and analysis, SNP Analysis, Gene Silencing
- 5. Aligning Pairs of Sequences, Phylogenetic analysis, Measure Evolutionary Distance
- 6. Protein Sequence Analysis
- 7. Data mining for microarrays, RNA Analysis, Gene Ontology Enrichment in Microarray Data
- 8. Docking and Drug Design, Drug Target Identification
- 9. Identifying Biomolecular Subgroups Using Attractor Metagenes
- 10. Predicting Protein Secondary Structure Using a Neural Network
- 11. Exploring Genome-wide Differences in DNA Methylation Profiles
- 12. Identifying Differentially Expressed Genes from RNA-Seq Data
- 13. Exploring Protein-DNA Binding Sites
- Next-Generation Sequencing data analysis, Working with Illumina Solexa Next-Generation Sequencing Data

ASSOCIATE PROFESSOR

Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

ND HEAD

- 15. Performing a Metagenomic Analysis
- 16. Working with Whole Genome Data, Comparing Whole Genomes
- 17. Analysis of a Protein Family
- 18. Analyzing Synonymous and Nonsynonymous Substitution Rates
- 19. Investigating the virus strains: Reconstructing the Origin and the Diffusion
- 20. Predicting and Visualizing the Secondary Structure of RNA Sequences Praduat Kumar Medda

47

# 21. Analyzing Gene Expression Data, Gene Expression Profile Analysis

# DSE 4 P -BIOINFORMATICS AND MOLECULAR BIOLOGY Lab 2 credit

After completion of this course the student will be able to

SI. No.	Course Objectives:		
1	Remembers, understands the various issues related to biodiversity loss and conservation as well as status, conditions and conservation of forests and wildlife.		
2	Understand and apply the various tools used in field biology		
3	Compare and evaluate the pitfall/ trail / transect monitoring for abundance and diversity estimation.		
4	Prepare on complete report on excursion or field visit.		

#### DSE 5 T: Biodiversity and Wild life Conservation

- Types of biodiversity, biodiversity and human welfare, mega diversity zones and biodiversity hot spots with special reference to India, problems and scales of biodiversity extinctions in time and space. 8 class
- 2. Diversity in bio-geographical regions of earth, fresh water and marine zones. 4 class
- Biodiversity indicators : Surrogate species.
- Concept of wildlife, values of wildlife, conservation ethics, importance of conservation, wildlife heritage of India, reasons for wildlife depletion in Indian context, Wild life strength, WPA (1972).
  - 5 class

1 class

- Protected area concept Sanctuary, National Park, Biosphere reserve, Core Zone, Buffer Zone, Corridor concept, Extended corridor, Conflicted Zones, Conservation reserves. Animals on the basis of smallest, largest, types, distribution.
- Habitat, Distribution, Habits, Status, Threats and Conservation strategies (King cobra, White rumped vulture, Great Indian bustard, Sanghai deer, Nilgiri Tahr, Musk deer, Red panda, Snow leopard, Lion tailed macaca, Hollock gibbon).
- Concept of threatened fauna IUCN categories, types, nature and consequences of threats to species diversity.
- Man-animal conflict (man-leopard, man-elephant and man-snake) causes, examples and mitigation measures.
   6 class
- Tiger conservation Tiger reserves in India; Management challenges in Tiger reserve. Elephant Conservation and Gangetic Dolphin Conservation.
   4 class
- JFM & Arabari model for conservation key stone, flagship and umbrella species. Environmental and conservation movements in India (Chipko movement, Silent Valley etc.)
- **4 class 11.** Role of NGO's in wildlife conservation in India. Mode of conservation action to be adopted.

2 class Pradyst Kumar Medda ASSOCIATE PROFESSOR AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

# DSE 5 P: BIODIVERSITY AND WILDLIFE CONSERVATION PRACTICAL (DSE P3)

### List of practicals

- 1. Collection of water samples to identify zooplanktons to relate with major potential habitat of gangetic dolphin.
- Demonstration of basic equipment needed in wildlife studies use, care and maintenance (Binoculars, Global Positioning System, Various types of Cameras and lenses).
- Familiarization and study of animal evidences in the field; Indirect evidences for identification of animals through pug marks/ hoof marks/ scats/ pellet groups/ nest/ antlers etc. (in field trip / excursion).
- 4. Identification of skulls of mammals.
- 5. Pitfall/ Trail / transect monitoring for abundance and diversity estimation of mammals/ bird/ arthropods (in field trip / excursion).
- 6. Laboratory notebook submission.
- Submission of a complete report on excursion /field trip in any National forest/ Wild life sanctuary/ Reserve forest/ Biosphere reserve.

### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level

01. 140.	Course Objectives:		
1	Remember, understand the importance, Goal and Scope of bioinformatics		
2	Understand, evaluate and use the biological databases to retrieve biological data		
3	Understand the basic concept of sequence alignment		
4	Understand and apply the Bioinformatics and biostatistics		

# DSE 6 T: COMPUTATIONAL BIOLOGY

# Unit 1: Introduction to Bioinformatics

Importance, Goal, Scope; Genomics, Transcriptomics, Systems Biology, Functional Genomics, . Metabolomics, Molecular Phylogeny; Applications and Limitations of Bioinformatics

### **Unit 2: Biological Databases**

Introduction to biological databases; Primary, secondary and composite databases; Nucleic acid databases (GenBank, DDBJ, EMBL and NDB); Protein databases (PIR, SWISS-PROT, TrEMBL, PDB); Metabolic pathway database (KEGG, EcoCyc, and MetaCyc); Small molecule databases (PubChem, Drug Bank, ZINC, CSD)

### Unit 3: Data Generation and Data Retrieval

Generation of data (Gene sequencing, Protein sequencing, Mass spectrometry, Microarray), . Sequence submission tools (BankIt, Sequin, Webin); Sequence file format (flat file, FASTA, GCG, EMBL, Clustal, Phylip, Swiss-Prot); Sequence annotation; Data retrieval systems (SRS, Entrez)

### Unit 3: Basic Concepts of Sequence Alignment

Scoring Matrices (PAM, BLOSUM), Methods of Alignment (Dot matrix, Dynamic Programming, . BLAST and FASTA); Local and global alignment, pair wise and multiple sequence alignments; Similarity, identity and homology of sequences, GAPS and INDELS.

#### **Unit 4: Applications of Bioinformatics**

Structural Bioinformatics (3-D protein, PDB), Functional genomics (genome wide and high . throughput approaches to gene and protein function), Drug discovery method (Basic concepts)

#### **Unit 5: Biostatistics**

Introduction, Measures of Central Tendency, calculation of standard deviation, standard error, Coefficient of Variance, Chi-square test, Z test, I-Test

	SEMESTER - I/II		
Course name	ANIMAL DIVERSITY AND SYSTEM	IS	
Course code	UGZOOGE01		
Number of lectures	umber of lectures 105		
Credits	6		
Marks	100		
New addition: 52% (I	ink) Modifications: 32% (Gre	en) Total Change: 84%	

#### **Course Objectives:**

After completion of this course the student will be able to

Sl. No.	Course Objectives:	
1	Remembers the general characters and special features in different animal groups.	
2	Understands and apply the taxonomy and classifications of animals.	
3	Remember and understand the basic endocrinology and histology of animals.	
4	Remember and understand the basics of developmental biology in animals.	

### UNIT 1: Taxonomy, Classification, General Account on Animals

- History of Taxonomy, Rules and schemes for classifying animals as laid by ICZN (brief idea). Type concept : names of Primary and Secondary types, their definitions and applications.
- 2. General characters and classification of Protozoa up to Phylum; Conjugation in Paramoecium.
- 3. General characters and classification of Porifera up to classes; Canal System in Sycon/Scypha.
- a. General characters and classification of Cnidaria up to classes; Polymorphism in Siphonophora.
- **5**. General characters and classification of Platyhelminthes up to classes; Life history of *Taenia* solium.
- 6. General characters and classification of Annelida up to classes; Metamerism in Annelida.
- 74. General characters and classification of Arthropoda up to classes; Peculiarities of respiration in Prawn and Cockroach.
- B. General characters and classification of Mollusca up to classes; Torsion in Gastropoda.
- 9. General characters and classification of Echinodermata up to classes; Water vascular system in starfish.
- 19. General features, Classification and Phylogeny of Protochordata, Mechanism of feeding in-Urochordata.
- 18. General features of Agnatha and classification of cyclostomes up to classes.
- 12 General features and classification of fishes up to orders; Osmoregulation in Fishes.
- 18. General features and classification of Amphibia up to orders; Parental care in Amphibia.
- **14** General features and classification of Reptilia up to orders; Poisonous and non-poisonous snakes; Biting mechanism in venomous snakes.
- 15 General features and classification of Aves up to orders; Exoskeletal structures in birds,
- K. General features and classification of Mammalia up to orders; ruminant stomach.

Note: Classification of Point 1 to be followed from Levine et al. (1980); Points 3 to 9 from Ruppert and Barnes (1994), Invertebrate Zoology, 6th edition; Points 10 to 16 from Young (1981).

### UNIT II: Endocrinology and Histology

10 class

 General characters of hormones; Naming and function of hormones secreted from Pituitary, Thyroid and Pancreas,

Pradyst Kumar Medda

40 class

2. Insects endocrine glands (in brief) and their role in metamorphosis.

3. Histology of pituitary, thyroid and pancreas.

# UNIT III: Developmental Biology

- 1. Spermatogenesis and Oogenesis; Fertilization in sea urchin.
- 2. Types of Eggs & Cleavages.
- 3. Process of Cleavage and Gastrulation in chick.
- 4. Extra-embryonic membranes in chick,
- 5. Concept of Protostomia & Deuterostomia.

### Course Outcomes:

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Define and demonstrate the general characters and special structures in different animal groups.		PSO 2	R, U
CO 2:	Demonstrate and apply the taxonomy and classifications of animals.	PO 2	PSO 2, 3	U, Ap
CO 3:	Define, demonstrate and illustrate the basic endocrinology and histology of animals.	PO 5	PSO 2	R, U, E
CO 4:	Define, demonstrate and illustrate the basics of developmental biology in animals.	PO 2, 3	PSO 2	R, U, E

Con	SEMESTER – I/II
Course name	ECOLOGY, ECONOMIC AND MEDICAL ZOOLOGY
Course code	UGZOOGE02
Number of lectures	105
Credits	6
Marks	Television -
New addition: 52% ()	Pink) Modifications:- 32% (Green) Total Change: 84%

SI. No.	pletion of this course the student will be able to Course Objectives:
1	Remembers, understands and apply the definition, principle and scope of fisheries and aquaculture, lac culture and pest management
2	Understand and evaluate the concept of ecology, biodiversity and wildlife conservation.
3	Remember, understand the concept of parasitism and evaluate the life history, pathogenicity and clinical features of selected parasites.
4	Remember, Understand the basic principles of biotechnology and immunology.

# GE T2: Ecology, Economic and Medical Zoology

### UNIT 1: Economic Zoology

- 1. Fisheries and Aquaculture : Principles, definitions and scope: Fisheries resource of India (inland and 20 class off-shore); Exotic fishes - their merits and demerits; Induced breeding and its importance; Basic principles of different Aquaculture system (Polyculture and Integrated farming); Marine pearl culture; Culture of prawn and shrimps.
- 2. Lac Culture : Types of Lac insects and host plants; Methods of lac cultivation; Products and uses; Problems and prospects.
- Pest and Pest management : Definition and types of pests; life history, damage and control of i) 3. Scirpophaga ii) Sitophilus iii) Bandicota; Concept on IPM.

### UNIT II: Ecology, Biodiversity and Wildlife Conservation

- 4. Ecology and Ecosystem : Definition, components, energy flow, food chain, food web, ecological pyramids.
- 5. Population : Definition and growth form.
- 6. Community : Definition and types.

7. Basic concept of Biodiversity; Biodiversity hotspots. Conservation of wild life - Purpose and method; importance and strategies of wildlife conservation; concept of Wildlife Sanctuary, National Park and Biosphere Reserve; conservation act and application. Animal cruelty and prevention act, 8. Scheduled I of wild life protection Act, 1972 and importance of schedules in conservation.

#### **UNIT III: Parasitology**

- 7 class 9. Parasitism : Definition and types; an outline idea of other interspecific interactions (symbiosis, commensalism and mutualism).
- Life history, pathogenecity and clinical features of
- a. i) Entamoeba histolytica ii) Plasmodium vivax iii) Ascaris lumbricoides

### UNIT III: Biotechnology and Immunology

- 11. Basic concept of genetic engineering and cloning.
- 12. Concepts of immunity innate and adaptive.
- 13. Outline structure and classification of immunoglobulin, Antigen Antibody reaction,
- 14. Basic principles of vaccination.

GE P2: Ecology, Economic and Medical Zoology Lab

### List of Practical

Estimation of dissolved O<sub>2</sub> content of water.

Psadyot Kumps Medda

ASSOCIATE PROFESSOR AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

8 class

2 credit

25 class

- 2. Estimation of dissolved free CO<sub>2</sub> content of water.
- 3. Measurement of pH of water.
- Sampling of zooplanktons and extraction of soil microarthropods.
- 5. Determination of ABO blood group and Rh factor.
- Identification (Scientific name, two specimen characters, and economic importance) Entamoeba histolytica, Plasmodium vivax, Ascaris lumbricoides, Taenia solium, Scirpophaga insertulas, Sitophilus oryzae, Bandicota bengalensis, Labeo rohita, Labeo bata, Cirrhinus mrigala, Hypophthalmichthys molitrix, Cyprinus carpio, Lates calcarifer, Teniolosa ilisha, Penaeus monodon, Macrobrachium rosenbergif.
- 7. Field Excursion submit report on field excursion at anyone place from below
  - i) Estuarine / Fresh water fish farm.
  - ii) Agricultural farms for pest study and idea of IPM practices.
  - iii) Species diversity studies in forest ecosystems / coastal regions.
  - iv) Places of wild life interests Reserve Forest, Sanctuary, National park, Biosphere reserve.
- 8. Viva voce
- 9. Laboratory Note Book

### Course Outcomes:

	SEMESTER – II
Course name	BIOTECHNOLOGY: MICROBES TO ANIMALS
Course code	UGZOOGE03
Number of lectures	105
Credits	6
Marks	100
New addition: 100%(	Pink) Modifications: 00% (Green) Total Change: 100%

After completion of this course the student will be able to

SI. No.	Course Objectives:	
1	Remembers, understands the concept of biotechnology.	
2	Understand and evaluate the techniques in gene manipulation.	
3	Understand and evaluate the application of microbes in biotechnology.	
4	Remember, understand and analyse the method of transgenic animal production.	
5	Remember and extend the basic concept in biotechnology and human welfare.	

## GE T2: Ecology, Economic and Medical Zoology

4 credit

Unit 1: Introduction

Concept and scope of Biotechnology

Unit 2: Techniques in Gene Manipulation

Restriction and modifying enzymes, Cloning vectors and Expression vectors, Transformation techniques, Identification of recombinants, Construction and screening of DNA libraries; Molecular analysis of DNA, RNA and proteins (i.e. Southern, Northern and Western blotting), DNA sequencing (Sanger's method and automation), Polymerase Chain Reaction, Microarrays, DNA fingerprinting: RAPD

Unit 3: Microbes in Biotechnology

Growth kinetics of microbes, Applications of microbes in industry (Concept of primary and secondary metabolites, Fermentation/Bioreactors, Downstream processing), Bioremediation and Biosensing

Unit 4: Transgenic Animal

Production of transgenic animals: Retroviral method, DNA microinjection method, embryonic stem cell method, nuclear transplantation; Applications of transgenic animals; Knockout mice; Transgenic livestock; Transgenic fish.

Unit 5: Biotechnology and Human Welfare

Animal cell technology: Concept of expressing cloned genes in mammalian cells, Recombinant DNA in health (Recombinant insulin and human growth hormone), Production of recombinant vaccines, Gene therapy: in vitro, in-vivo and ex-vivo. Ethical issues concerning: Transgenesis, Biosafety and Intellectual Property Rights

#### PRACTICAL

- 1. Isolation of genomic DNA from E. coli and analyze it using agarose gel electrophoresis
- 2. Isolation of plasmid DNA (pUC 18/19) and analyse it using agarose gel electrophoresis.
- 3. Transformation of E. coli (pUC 18//19) and calculation of transformation efficiency.

Pradigol- Kumar Medda ASSOCIATE PROFESSOR AND HEAD Dept. of Zoclogy R. K. Mission V.C. College Rahara, Kol-700118

- 4. Restriction digestion of lambda ( $\lambda$ ) DNA using EcoR1 and Hind III.
- 5. DNA ligation (lambda DNA EcoR1/Hind III digested).
- 6. Construction of restriction digestion maps from data provided.
- Study of Southern blot hybridization and PCR; Analysis of DNA fingerprinting (Dry Lab) Project on Animal Cell Culture

### Course Outcomes:

After completion of this course the student will be able to

CO N <sub>0</sub> ,	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Define, demonstrate and apply the concept of biotechnology.	PO 1	PSO 2	R, U, Ap
CO 2:	Demonstrate and analysing the techniques in gene manipulation	PO 2	PSO 2	U, An
CO 3:	Demonstrate and evaluate the application of microbes in biotechnology	PO 2	PSO 2	U, E
CO 4:	Define, demonstrate and evaluate the method of transgenic animal production.	PO 2, 3	PSO 2	<b>R</b> , U, E
CO 5:	Extend the basic concept in biotechnology and human welfare and perform experiments.	PO 3, 5	PSO 2, 3	U, C

R= remembering, U = understanding, Ap = applying, An = analysing, E = evaluating, and C = creating

	SEMESTER – II	
Course name	INSECT, VECTORS AND DISEASES	
Course code	UGZOOGE04	
Number of lectures	105	
Credits	6	
Marks	100	
New addition: 100%(	Pink) Modifications: 00% (Green)	Total Change: 100%

After completion of this course the student will be able to

Course Objectives: Remembers, understands the characteristic and morphological features of Insects.	
Understand and analyse different vectors of different orders.	
Understand, identify and analyse different vectors and their associated diseases.	

#### Theory

#### **Unit-1 Introduction to Insects**

General Features of Insects, Morphological features, Head - Eyes, Types of antennae, Mouth parts with respect to feeding habit

#### Unit-2 Concept of Vectors

Brief introduction to Vectors (mechanical and biological), Reservoirs, Host-vector relationship, Adaptations as vectors, Host specificity

#### Unit-3 Insects as Vectors

Detailed features of insect orders as vectors - Diptera, Siphonoptera, Siphunculata, Hemiptera

### Unit-4 Dipteran as Disease Vectors

Study of important Dipteran vectors - Mosquitoes, Sand fly, Houseflies Study of mosquito-borne diseases - Malaria, Dengue, Chikungunya, Viral encephalitis, Filariasis Control of mosquitoes

### Unit-5 Siphonaptera as Disease Vectors

Fleas as important insect vectors; Host-specificity, Study of Flea-borne diseases - Plague, Typhus fever; Control of fleas

### Unit-6 Siphunculata as Disease Vectors

Human louse (Head, Body and Pubic louse) as important insect vectors; Control of human louse

### **Ùnit-7 Hempitera as Disease Vectors**

Bugs as insect vectors; Blood-sucking bugs; Chagas disease, Bed bugs as mechanical vectors, Control and prevention measures

# ZOOGCOR03P: Insect Vectors and Diseases Lab

### List of Practical

- 1. Mounting and Study of different kinds of mouth parts of insects
- insect following vectors identification of through permanent 2. Spot slides/photographs:Acdes,Culex,Anopheles, Pediculus humanuscapitis, Pediculus

#### SKILL ENHANCEMENT COURSE (SEC)

	SEMESTER – III	
Course name	Value Education and Indian Culture	
Course code	UGZOOSEC01	
Number of lectures	30	
Credits	2	
Marks	50	
New addition: 100%(	Pink) . Modifications: 00% (Green)	Total Change: 100%

#### **Course Objectives:**

After completion of this course the student will be able to

Course Objectives:
Attain awareness about daily routine, self-evaluation & Integral Personality Development
Understand the educational needs, the Power of thoughts and the Science of Peace
Understand the relation: Values and enlightened citizenship
Attain awareness about the Indian Practice and Culture
Demonstrate the importance of Four Yogas
Acquire idea about Modern India: her hopes, challenges and Swami Vivekananda

#### PGZOOSOC 3: Value Education and Indian Culture

#### Unit1: Daily Routine:

- · A suggested daily routine
- · The daily routine & the concept of Biological clock: key to a healthy and productive life
- Necessity for an all-round daily routine
- · Combining Rest and Activity, Hardships and Joy in a daily routine
- The scope of developing the power of concentration and detachment through a daily routine
- · Daily Routine disciplines the system but confers conviction on oneself

### Unit2: Self Evaluation & Integral Personality Development:

- Why is Self-Evaluation important? Because if you win yourself, you win the world
- Quantitative Self Evaluation for a qualitative change: A method
- Traits to track Personality Development: Academic Excellence, Social Compatibility, Participation in Group events, Sense of Responsibility, Role as a Consumer, Scientific Temperament, Aesthetic taste and creativity, Leisure time Activities, Concern for others, Spiritual values.
- Close and Constant Self Evaluation : a stitch in time saves nine
- The world is as we are : A minor inner change may nullify a major outer perturbation

### Unit3: Our Educational Needs

- The need of a correct blend of inner and outer well-being in education
- · Man-making, Character building education : growing from within , a surer foundation of progress
- The outer crust and the inner core of our personality: "What you are shouts so loudly in my ears that I cannot hear what you say."
   Padypt Kumar Mee

Radyot Kumar	Medda
ASSOCIATE PROFESSO	OR
AND HEAD	
Dept. of Zoology	
R. K. Mission V.C. Colleg	je
Rahara, Kol-700118	

#### 2 classes

2 classes

Class: 60 hrs

2 class

A 5-point training in Discipline, Cleanliness, Behaviour, Manners and Ambition

- Sharpening the sword of will: controlling its expression, a basic educational need
- How to study effectively?

# Unit4: The Power of thoughts and the Science of Peace

- Shanti Mantras: Peace can be radiated from and reflected back upon ourselves
- You can create an ambience and others can enjoy it, can be benefitted by it.
- How to create a positive, peaceful and inspiring ambience?- the aggressive exertion and the unquestioning sacrifice involved in it

### Unit5: Subhashita: The Well said

- Bringing home high thoughts in nuggets of wisdom
- · Pearls of Wisdom and flames of fire: simple parables and anecdotes from the great ones.

### Unit6: Values and Enlightened Citizenship

- Intrinsic and Instrumental Values
- · What makes a man great? A powerful will to do good born out of self-control and self-sacrifice
- Learning the art of inter-personal relations: Not I but You
- The combination of the Head, Heart and Hand: a valuable value for Enlightened Citizenship

#### Unit7: Indian Practice and Culture

- The idea of sacredness & its necessity
- Every aspect of life is sacred in India
- · Renunciation and service the twin ideals for India
- · My freedom from Nature helps me to serve nature and the world better
- I never say I am the body, I always say this body is mine : I as a master of the body-mind complex
- Weakness is death: in search of real strength of self-knowledge, reliance on God and unselfish service
- · Meditation, Concentration and the silent Indian path for becoming a dynamo of power
- The Indian concept of Unity in diversity: Harmony of Religions

#### Unit8: Four Yogas

- · The Real and Apparent Man, the science of knowing myself: Jnana Yoga
- · Taming the mighty current of emotions and giving them their right food: Bhakti Yoga
- The Science of working wisely: Karma Yoga
- The Process of making my mind mine: Raja Yoga
- Selected portions from Swami Vivekananda's Karma Yoga
- · Harmony of 4 Yogas: a needed balance for the modern man

## Unit9: Modern India: her hopes, challenges and Swami Vivekananda

- Swami Vivekananda's method of combining the best of the East & the West: where Indian values and Western workmanship join hands
- Invigorating rationality in the field of the Indian search for the supreme joy : erasing the misconception of dogmatism
   Praducet Kumar Medda

ASSOCIATE PROFESSOR AND HEAD Dept. of Zoology R. K. Mission V.C. College Rahara, Kol-700118

#### 3 classes

2 classes

2 class

3 class

2 classes

2 classes

- Rousing a sense of pride in the age-long Indian discoveries in the field of inner truths as opposed to an inferiority complex posed by Western material supremacy.
- Do you feel: Service, Swami Vivekananda's acid test for modern science and traditional spirituality.

### Unit10: Students' Presentations/Project: (may be in groups)

10 hrs

Project on Service, Teaching and Cleanliness

#### **Course Outcomes:**

		SEMESTER – IV	
Course name	Spoken '	Tutorial on CellDesigner	
Course code	UGZOO	DSEC02	
Number of lectures	30		
Credits	2		
Marks	50		
New addition: 100%(	Pink)	Modifications: 00% (Green)	Total Change: 100%

After completion of this course the student will be able to

Sl. No.	Course Objectives:	
1	Install and start the CellDesigner program	
2	Understand various aspects of CellDesigner system	
3	Create a new model	
4	Running the simulation	
5	Viewing a Model and connect to Database	

#### UGZOOSEC II: Spoken Tutorial on CellDesigner

#### Class: 30 hrs

#### **Installation of CellDesigner 4.3**

CellDesigner series- based on version 4.3, Startup guide for first-time users of CellDesigner, Software requirement, Download & Installation of CellDesigner, On Windows OS, Adding a protein species,

#### Getting Started with CellDesigner

General view of CellDesigner, The Menu & Tool Bar, Components, Species & Reaction, Creating a simple network: Name & Size of the network, Grid Visible, Grid Snap, Change size of network, Select a component, Move/Delete a component, Undo/Redo, Change the size of the component, Save the Network, Zoom.

#### **Create and Edit Components**

Open an already saved .xml file, Change the following in a Compartment- Size, shape, color and thickness of the border, Create multiple files in CellDesigner, Learn about Start-point and End-point of a Species, Change identity of Species and Reaction

### Creating a new Model

Species, Add a Protein on the Canvas, Add Protein Residues, Change the Residue/Region Status, Create Reaction, Tidy up your diagram layout, Export Images / Print Images, Customizing Properties, Add Notes (c.g. literature references) and MIRIAM to Proteins/Reactions, Refer to the databases

## **Build and Modify Process Diagram**

Use Macros, Move all components to another side of the draw area, Align a Reaction line, Extend a Reaction line, Build a Process diagram using CellDesigner

PRAdyot Kumar Medde ASSOCIATE PROFESSOR

#### **Customizing Diagram Layout**

To change color, shape and width of a Reaction line, Add Anchor points to a Reaction line, Align Components, Show/hide Reaction ids, Adding notes to Components, Editing Protein or Gene, Editing information, And to get a bird's eye view of the diagram.

#### **Course Outcomes:**

After completion of this course the student will be able to

CO No.	Course Outcomes:	POs Addressed	PSOs Addressed	Cognitive Level
CO 1:	Recall how to install and use the CellDesigner programme	PO 5	PSO 2, 5	R
CO 2:	Build gene-regulatory and biochemical networks by CellDesigner, a structured diagram editor.	PO 5	PSO 2, 5	Ар
CO 3:	Design models of biochemical reaction networks in Computer-readable format.	PO 5, 6	PSO 2, 5	AP
CO 4:	Analyze simulation and other analysis packages.	PO 5, 6	PSO 2, 5	An
CO 5:	Relate data representation with various pictorial representations.	PO 5, 6	PSO 2, 5	U
CO 6:	Browse and modify existing SBML models with references to existing databases, simulate and view the dynamics through an intuitive graphical interface.	PO 5, 6	PSO 2, 5	E, C

R= remembering, U = understanding, Ap = applying, An = analysing, E = evaluating, and C = creating

	SEMESTER – II	
Course name	ENVIRONMENTAL SCIENCE (ENVS)	
Course code	UGAECC02	
Number of lectures	30	
Credits	2	
Marks	50	
New addition: 100%(	Pink) Modifications: 00% (Green)	Total Change: 35%

After completion of this course the student will be able to

CO No.	Course Objectives:		
CO 1:	Remembers and understands the concept, components and function of natural resources and ecosystems.		
CO 2:	Understand and evaluate the Cause, effects and control measures of various environmental pollutants.		
CO 3:	Understand the basic idea about the disasters and its management.		
CO 4:	Understand and apply the knowledge about the social, environmental issues and environmental legislation.		

1. Definition, scope and importance. Need for public awareness.

 Natural Resources: Renewable and non-renewable: Forest, Water, Mineral, Food, Energy & Land resources – Use and associated problems.
 4 classes

- Ecosystems: Concept, Structure and function, Energy flow, Ecological succession, Food chains, food webs and ecological pyramids. Types Forest, Grassland, Desert & Aquatic (ponds, streams, lakes, rivers, oceans, estuaries) ecosystems.
   6 classes
- Environmental Pollution: Definition, Cause, effects and control measures of Air, Water, Soil, Noise pollution and Nuclear hazards. Solid waste Management. Role of an individual in prevention of pollution.
- 5. Disasters and management: Floods, Earthquake, Cyclone and Landslides. 4 classes
- 6. Social Issues and the Environment: Water conservation, rain water harvesting, watershed management. Resettlement and rehabilitation of people; its problems and concerns.
